Subject: Trish completed Make a submission

Trish just submitted the survey Make a submission with the responses below.

Full name:

Trish Falconer

City / town:

Invercargill

Postcode: 9810

Do you support the proposed changes to the Code of Practice for Subdivision, Land Use, and Development?

Yes, but with amendments

What is your submission on the proposed Code of Practice?

5.3.18 Vehicle crossings. Support - Fourth paragraph, 2nd and 3rd sentences. Minimum spacings between crossings relate to distances from an intersection or corner. Support no minimum spacing between vehicle crossings. Amend - The fourth paragraph, 1st sentence, can be read such that all farm gateways that access a road would need to be upgraded or permanently removed at the time of subdivision or development. Suggest amending the first sentence of the fourth paragraph to the following: "At the time of subdivision or development, any regularly used existing vehicle crossing that provides access to the road shall be upgraded to Council's standard or permanently removed." 9.5 Connection to Electricity and Telecommunications Services Support - "Unless otherwise approved by Council through a resource consent decision, all new allotments shall have physical connections to power and telecommunications utilities." This allows both councils to consider whether P&T need to be installed as a resource consent requirement. It is anticipated that physical telecommunications will not generally be required.

Do you support the changes to the District Plan to align with the proposed new Code of Practice?

Yes

Would you like to speak to SDC and ICC to support your submission on the proposed new Code of Practice?

Yes

Would you like to receive updates about Invercargill City Council's future consultations and engagements?

Yes
