Purpose

This procedure is intended to:

- ensure the safety of other road users by providing a safe surface that will not cause drivers to lose control.
- protect the integrity of the road.
- minimise contamination of waterways.
- minimise the spraying of passing vehicles with dust suppressant.

Procedure

Application for permit

The applicant (property owner or contractor) requires a permit from Council before applying dust suppression agents. Permits for dust suppression are to be sought annually, and should be lodged with Council allowing enough time for pre-application grading. Each application shall be accompanied by the prescribed fee as set out in the Council's Schedule of Fees and Charges.

Applications shall include the following:

- full name and postal address
- address of property including rapid number where dust suppressant is to be applied
- the length of roadway section to be treated
- state the type of dust suppressant to be used
- the name of company/person who will be applying the suppressant
- a proposed temporary traffic management plan for use by the applicator during the application of the dust suppressant
- sign location and approved SDC sign for current year
- evidence of public liability insurance.

Dust suppression agents may be applied to unsealed roadways between and including the months of October through March subject to the conditions of the permit, however as part of the Proposed Southland Water and Land Plan (Rule 17), **resource consent is now required from Environment Southland if you are planning to apply any suppressant onto a road, unless it is approved under the Hazardous Substances and New Organisms Act 1996.**

You must still abide by the conditions set out by Environment Southland.

Note: Southland District Council will not be able to issue your new dust suppression permit without confirmation from Environment Southland that your application complies with the new rules.

Public liability insurance

The applicant shall be responsible for any damage to public or private property, which may arise from application of the dust suppressant.

To protect their liability for damage to third parties, the applicant shall arrange and keep in force public liability insurance to the minimum value of \$1,000,000.

Evidence of this insurance shall be required before any application is approved.

Use of dust suppressants

Treatment length

The applicant shall only treat a minimum length of roadway to provide dust relief to a dwelling. Treated surfaces shall be clearly visible to approaching traffic from 150 metres.

Advisory signage shall be erected by the applicant (these are provided by Council as part of the permit). Sites located within 100 metres of an intersection do not require signage when approaching from the intersection.

Limitations to application

Dust suppressant shall not be applied to the roadway surface where this would require working of the roadway surface (eg lime/cement stabilisation etc) until the applicant has received specific approval of Council. Due care shall be taken to prevent excess suppressant escaping into drainage systems.

Dust suppressants shall not be applied to the roadway when the surface is wet or when wet weather is pending or when the surface has wheel ruts or potholes ie, any depressions that will hold water.

Grading of treated area

Council shall endeavour to restrict grading of treated sections of roadway unless the section becomes badly rutted or potholed. The section however will be graded up during winter when reshaping of the pavement is carried out.

The property owner shall be responsible for maintaining the treated section free of rutting and potholes outside the winter maintenance grading period.

Warning - should the treated surface become a hazard to drivers either due to excessive suppressant having been applied or potholes not being filled, the Council will arrange for their maintenance contractor to grade out the treated section. No financial or material compensation for the effects of the grading will be paid by Council or its agents.

Note - a permit to allow the application of dust suppressants does not authorise the application of a dust suppressant in circumstances where the dust suppressant may enter water.

General conditions of approval

Council permits access to Council's infrastructure subject to the following conditions. The works are to be carried out under the following Acts, Regulations and Bylaws: Roading Policy and Procedures 2008 and Proposed Southland Water and Land Plan (Rule 17).

1. The applicant shall pay all required fees and charges at the time of application. The fee will be refunded should the application be declined.
2. The applicant shall submit to Council prior to the commencement of works a temporary traffic management plan for Council's review and approval.

Special conditions

The applicant shall submit this application to Council at least 10 days prior to the commencement of the work.

Conditions of approval – carriageway

1. The work shall be carried out by an approved contractor and the applicant shall meet all costs.
2. Location, placement and installation of works shall be in accordance with the Code of Practice and/or bylaw.

Conditions of approval – other

1. The applicant shall meet all costs associated with this application for dust suppression.
2. Maintenance of the treated section is now the responsibility of the applicant. Signs must be erected at both ends of the treated section and stay in place for the duration of the permit. The permit is valid between and including the months of October through to March

The applicant by his/her signature hereto agrees to indemnify Council, its officers, or employees to the full extent of any liability to or in respect of any person for any fault act or omission by the applicant or the applicants servants agents or contractors in the carrying out of any work or activity approved by Council in this application.

Council shall not be held responsible in any way for claims for damages and it is a condition of the issuing of this permit that the applicant and/or the contractor undertaking the work erect signs and/or barricades sufficient to provide safety to the public, and keeps in force public liability insurance to protect liability for damage to third parties.

Any personal information within the meaning of the Privacy Act 1993 provided on this application form will be used only for the purposes of this application. As the applicant you have the right under the 1993 Act of access to personal information held by Council about you and you are also entitled to request information about you to be corrected.
